

TAKE YOUR ADVENTURES  
TO A NEW LEVEL

**BJ40 SE**

**BJ40 C**

**BJ40 F**

# BJ40 SE

*Powerful performance,  
exceptional appearance*

# BJ40 F

*A Wide Space,  
a new vision*

AVAILABLE IN TWO COLOR

Interior Ambient light

The luxurious interior provides an upscale environment for everyone inside it, with multi-colored interior lighting, you can get a new view of what's around you

Air Conditioner

Automatic air conditioner based on intelligent temperature control system. And it works to reduce fuel consumption and passengers in the rear seats can also maintain a moderate climate thanks to the rear air conditioning vents

Borgwarner System

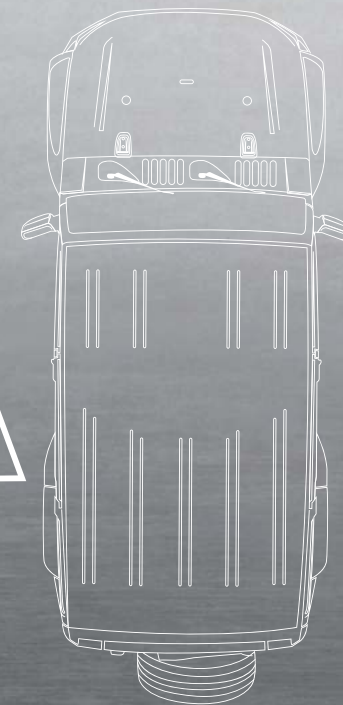

The most powerful, smartest and most fuel-efficient system. It helps to adapt to all road conditions with three modes of driving, which makes it bear more torque and is easy to operate. By means of a button integrated with the vehicle start button

RE  
MOVABLE

ROOF

## Surround Speaker System

An immersive experience to satisfy all your senses through the existing headphones in all seats, thanks to the unique loudspeaker system

## OPTIMIZED BODY DESIGN

## Speed and stability

The BJ40 features a quadruple body made of solid steel To improve switching between tracks easily and ensure stable performance The car makes it able to withstand all types of terrain

*Stunning design,  
professional capabilities*

**BJ40 C**

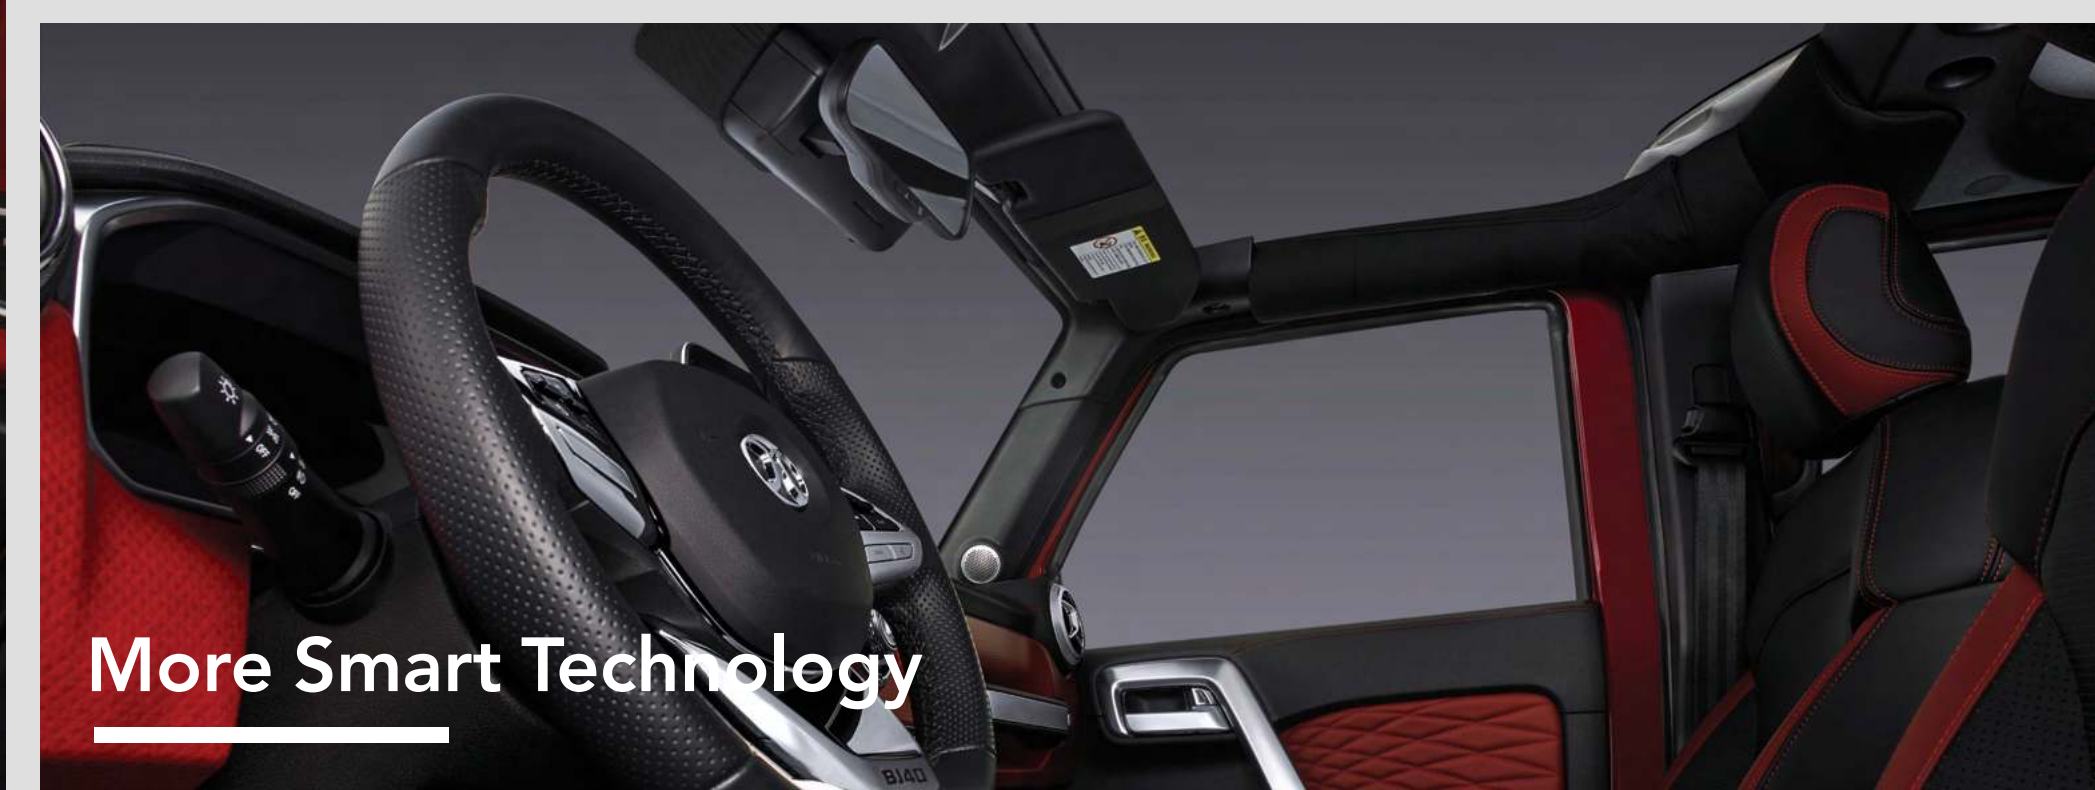

## Modern interior design

Luxurious interior design with a sporty double-colored character and a chrome restaurant, as well as a screen with 10 Inch with a phone link feature, highlighting the modern technology used and matching entertainment in one size With the style of integrating luxury in off-road vehicles and a digital video recorder with a camera HD resolution is built into the base of the interior mirror, which helps to cover three tracks and features With a rear camera, which reduces blind spots with HD clarity on the interior view mirror

**New and high performance**  
2.0L turbocharged engine mated to an 8-speed automatic transmission ZF from a German company, one of the best manufacturers of transmissions and provides Multiple choices of power and provides a great ability to adapt to road conditions with 221 horsepower and 350 n.m of torque

## More Smart Technology

(EBA)

### Emergency Brake Assist

It can automatically increase the braking effect, shorten the braking distance instantaneously and enhance the safety when encountering unexpected incidents in driving.

(ABS)

### ABS Anti-lock Braking System

It can automatically control the braking force to ensure that the vehicle does in case of not run out of control over-steering or under-steering.

(RMI)

### anti-rollover control system

By perceiving the position of the vehicle, adjusting the engine torque and the braking power of each wheel, the lateral adhesion of the vehicle is destroyed when the rolling trend occurs, and the rollover is avoided.

### HAC Upslope Assistance & Slow descent of HDC steep slope

When the vehicle starts on the ramp, it can automatically keep braking for 2 seconds to prevent the vehicle from sliding, When the vehicle goes downhill, without braking, it will automatically give a certain braking force and smoothly pass through the steep downhill section to prevent inertial impact.

(ABD)

### ABD Brake Force Distribution System

EBD electronic braking force distribution system can automatically adjust the braking power distribution ratio of front and rear axles to enhance braking effect.

(TCS)

### TCS traction control system

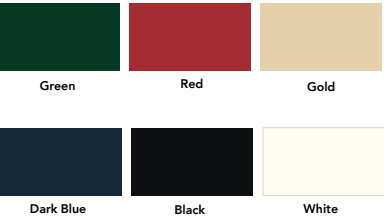

When the wheel slips, the driving force is controlled and the braking force is increased when necessary, so as to keep the vehicle running stably and prevent side slip.
