The Leading Edge of People Moving

HIACE DELUXE — a commercial vehicle for use by true professionals — is now further evolved and ready to hit the road. Its unwavering quality to date remains unchanged, while its styling has been updated. In addition, HIACE DELUXE guarantees the practicality and comfort levels of the minivan class. Meeting the demands of a new era, enabling transportation in comfort and security.

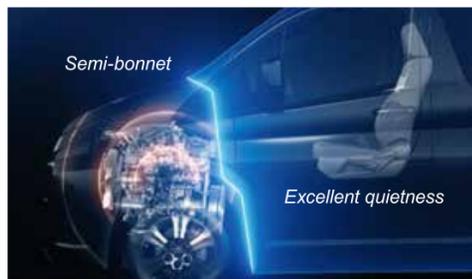

New HIACE DELUXE Promising fresh prospects for your business.

Superior Entry and Exit

The width of the sliding door opening has been increased and a large door step with lamp installed, making entry and exit even easier for occupants.

Comfortable and Quiet Cabin

With the semi-bonneted front-end design, the engine, which until now has been located beneath the front seats, is shifted forward. This helps create a cabin space with enhanced quietness and comfort.

Air Conditioning

A high-performance manual air conditioner is installed, which enables control of the air conditioning for rear seat passengers from the AC controller on the instrument panel. Roof-mounted air vents are provided, helping create a comfortable space for all occupants.

Supporting Business with Comfort

Occupants are, of course, treated to comfort while on the move. But attention is also paid to hospitality on entering and leaving the vehicle. HIACE values comfort and convenience at all times during business commuting.

Handling of Every Task

In designing the cockpit, we focused on an excellent field of view at the front as well as plentiful storage space. The cockpit is easy to use and gives the driver a feeling of confidence for sure and comfortable operations across a whole range of work scenarios.

Storage Spaces

- 1 Door pockets with space for A4 size files.
- 2 Convenient console tray with removable partition.
- 3 Overhead tray for neat storage of items for immediate access. (Long body only)
- 4 Overhead console for storage of small items.

Wide Front Door Step

Front seat access is made easier by installing a wide front door step.

Excellent Driving Visibility

The anterior of the front side window has been lowered and a large quarter glass installed to help ensure excellent forward visibility. An auxiliary mirror has been added, enabling checking in the downward field of view.

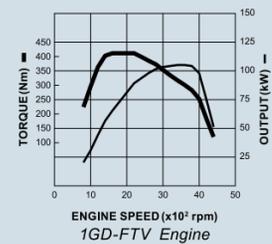

Comfort Born of a Powerful and Stable Ride

The suspension and other parts of the undercarriage have been renewed, and the engine relocated in a semi-bonneted configuration. This helps provide a powerful, stable and quiet ride, for sustained comfort even on long commutes.

Safety Technology Supporting World-Class Quality

Equipped with various technologies—from active safety, which dramatically enhances peace-of-mind, to passive safety that minimizes damage in the event of a collision. These technologies engender safety and security for both the driver and passengers.

Engine

The 1GD-FTV engine features a turbocharger with intercooler, which helps produce powerful dynamic performance while enhancing fuel economy and quietness.

Suspension / Brakes

A MacPherson strut suspension is installed for the front and a leaf spring suspension for the rear, helping assure ample suspension stroke. The suspension helps achieve excellent straight-line stability as well as a quiet and comfortable ride. The installation of disc brakes for the front and rear yields excellent braking force.

Transmission

The 6 Speed Automatic Transmission simultaneously achieves a top-class level of fuel economy and excellent dynamic performance. An automatic transmission enhances durability, acceleration performance, while reducing cabin noise.

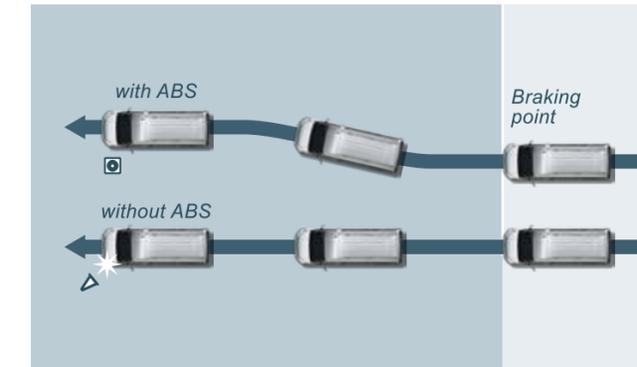

Airbags

Airbags are provided for the driver and front passengers.

Collision Safety Body

A semi-bonneted configuration is used for the front, to efficiently absorb impact energy in the event of a collision. This contributes to excellent crash safety.

Anti-Lock Brake System with Electronic Brake-Force Distribution

In addition to ABS, which helps prevent wheel lock-up during braking, the installation of EBD helps ensure optimal distribution of braking force to the left and right wheels.

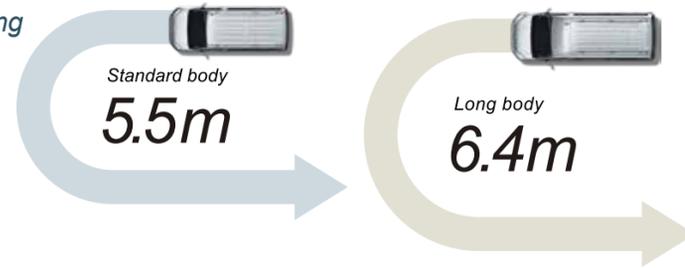

Electro Chromic Rearview Mirror

In Electro Chromic Mirror mode, the mirror detects the amount of reflected light to enhance visibility.

The back monitor is displayed within the inner mirror.

Minimum Turning Radius

Exterior

Spacious Rear Door

LED High Mount Stop Lamp for easy recognition

License Plate with LED Lamps for better visibility

Exterior Vertical Door Handle for better controllability

5-LED Vertical Head Lamps & Fog Lamps add to the iconic design

Rearmost row foldable seats for greater storage space

16-inch High Quality Steel Wheels for stronger grip & reliability

Large sized Rear Combination Lamps with a bold Aerodynamic design for style & enhanced driving stability

Interior

Rear Seats

- A combination of synthetic leather & fabric, highlighting the excellent detailing & workmanship
- Rear lamps and USB ports are fitted within easy reach of all back seats
- Rear armrests & assist grips are provided for passenger convenience
